

CHINMAYA BEHERA

+91 9348374146 | Bengaluru, Karnataka, India | chinmayabehera891@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SKILLS

Languages : JavaScript, Python, C++, TypeScript, SQL

Frameworks : Node.js, Express.js, React.js, Redux, Django, GraphQL

Database : MongoDB, PostgreSQL

Tools : Git, Bitbucket, Swagger, Postman, GitLab, JIRA, Cypress

Cloud & DevOps : AWS, Azure, GCP, Docker, Kubernetes, Jenkins, Terraform

EXPERIENCE

Software Engineer I | Hypersage Technology | Bengaluru, Karnataka, India

Dec 2023 – Present

- Devised and maintained scalable MERN stack applications and Python applications collaborating with backend engineers and delivering new features that improved user engagement by 15%.
- Enhanced API and backend system efficiency by 20% through optimized implementations and maintenance
- Contributed to the DevOps pipeline, implementing containerization using Docker and automating deployments with Jenkins, resulting in a 25% increase in deployment speed

Associate Software Engineer | Technoboot Pvt Ltd | Bhubaneswar, India

Aug 2023 – Nov 2023

- Built and Assimilated backend APIs using Node.js, improving data communication efficiency by 20%.
- Applied Redux for efficient data management, reducing state management issues by 25%, improving project efficiency by 20%.

PROJECTS

E-commerce Platform for Baby Products | [Link](#)

Tech Stack: MERN | Material-UI | Redux | JWT Authentication | Swagger | GCP | Jenkins | Docker

- Designed a MERN e-commerce platform, managing product catalogs, user authentication, and order processing, leading to a 20% increase in system efficiency.
- Utilized GCP for scalable cloud infrastructure and Docker for seamless deployment across environments
- Executed CI/CD pipelines using Jenkins and managed version control with Bitbucket, reducing deployment time by 25%
- Documented APIs using Swagger, enhancing collaboration and reducing errors by 20%.

Task Management System | [Link](#)

Tech Stack: MERN | Material-UI | Docker | AWS | JWT Authentication

- Created a task management system with admin and user panels for versatile project and task handling.
- Implemented JWT for secure authentication to protect user and admin data
- Optimized MongoDB queries, reducing task retrieval time by 30% and improving database performance by 25%.
- Achieved enhanced productivity with dashboards that increased task completion rates by 40% for users and improved admin efficiency by 35%.

AI Blog Generator | [Link](#)

Tech Stack: Python | Django | FastAPI | PostgreSQL | AssemblyAI | OpenAI | Docker | Kubernetes

- Crafted an AI-powered blog generation tool that automatically converts YouTube video links into well-structured blog articles, improving content production speed by 50%.
- Merged OpenAI and AssemblyAI for natural language processing (NLP) and speech-to-text conversion, achieving 90% accuracy in content extraction.
- Deployed the application using Docker and Kubernetes, resulting in 40% better resource utilization and a 30% improvement in scalability.

Billing and Inventory Management App | [Link](#)

Tech Stack: Node.js | Express.js | MongoDB | Swagger

- Engineered backend for a billing and inventory app, enhancing tracking and reporting efficiency by 25%.
- Developed real-time inventory APIs and integrated BoxPay, cutting transaction errors by 20%.
- Recorded APIs with Swagger, improving frontend integration and reducing development time by 15%.

EDUCATION

Master's In Computer Application

Dec 2021 – Sep 2023

Trident Academy Of Creative Technology, Bhubaneswar, India | **CGPA 8.5**

B.Sc. ITM(Information Technology Management)

Aug 2018 – Sep 2021

Udayanath Autonomous College of Science and Technology, Adaspur, Cuttack **CGPA 6.8**

ACHIEVEMENTS

HackerRank Node.js | [Link](#) | 2024 , HackerRank JavaScript | [Link](#) | 2024

HackerRank Python | [Link](#) | 2024
